

## SSA-313039: Deserialization Vulnerability in STEP 7 Safety before V19

Publication Date: 2024-07-09  
Last Update: 2024-07-09  
Current Version: V1.0  
CVSS v3.1 Base Score: 6.3  
CVSS v4.0 Base Score: 7.0

### SUMMARY

Affected applications do not properly restrict the .NET BinaryFormatter when deserializing user-controllable input. This could allow an attacker to cause a type confusion and execute arbitrary code within the affected application.

Siemens has released a new version for SIMATIC STEP 7 Safety V18 and recommends to update to the latest version.

### AFFECTED PRODUCTS AND SOLUTION

Affected Product and Versions	Remediation
Totally Integrated Automation Portal (TIA Portal):	Update to V18 Update 2 or later version <a href="https://support.industry.siemens.com/cs/ww/en/view/109817218/">https://support.industry.siemens.com/cs/ww/en/view/109817218/</a> See further recommendations from section <a href="#">Workarounds and Mitigations</a>
Totally Integrated Automation Portal (TIA Portal) V18:	Update to V18 Update 2 or later version <a href="https://support.industry.siemens.com/cs/ww/en/view/109817218/">https://support.industry.siemens.com/cs/ww/en/view/109817218/</a> See further recommendations from section <a href="#">Workarounds and Mitigations</a>
SIMATIC STEP 7 Safety V18: All versions < V18 Update 2 affected by <a href="#">CVE-2023-32737</a>	Update to V18 Update 2 or later version <a href="https://support.industry.siemens.com/cs/ww/en/view/109817218/">https://support.industry.siemens.com/cs/ww/en/view/109817218/</a> See further recommendations from section <a href="#">Workarounds and Mitigations</a>

### WORKAROUNDS AND MITIGATIONS

Siemens has identified the following specific workarounds and mitigations that customers can apply to reduce the risk:

- Avoid uploading PLC software from untrusted devices or MMC cards

Product-specific remediations or mitigations can be found in the section [Affected Products and Solution](#). Please follow the [General Security Recommendations](#).

## **GENERAL SECURITY RECOMMENDATIONS**

As a general security measure, Siemens strongly recommends to protect network access to devices with appropriate mechanisms. In order to operate the devices in a protected IT environment, Siemens recommends to configure the environment according to Siemens' operational guidelines for Industrial Security (Download: <https://www.siemens.com/cert/operational-guidelines-industrial-security>), and to follow the recommendations in the product manuals. Additional information on Industrial Security by Siemens can be found at: <https://www.siemens.com/industrialsecurity>

## **PRODUCT DESCRIPTION**

SIPLUS extreme products are designed for reliable operation under extreme conditions and are based on SIMATIC, LOGO!, SITOP, SINAMICS, SIMOTION, SCALANCE or other devices. SIPLUS devices use the same firmware as the product they are based on.

Totally Integrated Automation Portal (TIA Portal) is a PC software that provides access to the complete range of Siemens digitalized automation services, from digital planning and integrated engineering to transparent operation.

## **VULNERABILITY DESCRIPTION**

This chapter describes all vulnerabilities (CVE-IDs) addressed in this security advisory. Wherever applicable, it also documents the product-specific impact of the individual vulnerabilities.

### **Vulnerability CVE-2023-32737**

Affected applications do not properly restrict the .NET BinaryFormatter when deserializing user-controllable input. This could allow an attacker to cause a type confusion and execute arbitrary code within the affected application.

This is the same issue that exists for .NET BinaryFormatter <https://docs.microsoft.com/en-us/visualstudio/code-quality/ca2300>.
